**Johanson Manufacturing Corporation  
 Releases the 67XXX Variable Capacitor  
 Series as a Cost Effective, RoHS Compliant  
 Compliment to the Giga-Trim Series**

Boonton, NJ, 17 March 2015: Johanson Manufacturing Corporation has announced the release of its new low cost variable capacitors, the 67275 and 67295 (Patent Pending), as part of the Giga-Trim family of products. The development of these units comes in response to today’s demanding market needs for reduced size and reduced cost. However, this does not mean that performance, reliability or quality has been sacrificed. The 67275 and 67295 continue the **70 year** tradition of robust design/high quality products expected from Johanson Manufacturing Corporation.

The characteristics of the units are as follows:

	<b>67275</b>	<b>67295</b>
<b>Capacity Range</b>	0.6 pF to 3.0 pF	0.8 pF to 6.0 pF
<b>Working Voltage</b>	250 Vdc	250 Vdc
<b>Q @ 100 MHz</b>	>2000	>2000
<b>Insulation Resistance</b>	>10 <sup>6</sup> Megohms	>10 <sup>6</sup> Megohms
<b>Structure</b>	Brass	Brass
<b>Dielectric</b>	Ceramic	Ceramic

Johanson Manufacturing Corporation is a well established brand known originally for its capabilities in designing and manufacturing variable capacitors. Through our 70 year history, we have taken our core capabilities and have extended our product line to include resistive products, tuning products, complex machining and plating, and specialized electronic and photonic packages. Our markets include wireless communications, satellite communications, medical, avionics, test equipment and defense electronics markets. We have ISO-9001 facilities located in New Jersey and the Dominican Republic.
